PROFESSIONAL SUMMARY

Full Stack Software Developer with 1.5+ years of experience engineering production-grade enterprise web applications utilizing Laravel, Vue.js, and MySQL. Proven track record in optimizing database queries, building real-time SPA architectures, and deploying secure, scalable financial and ERP modules. Skilled at translating complex client business workflows into robust technical solutions that improve operational efficiency.

PROFESSIONAL EXPERIENCE

Junior Software Developer

Innovation Information System Ltd., Dhaka | Jan 2025 – Present

- Engineered and maintained 3+ secure, enterprise-level web applications using Laravel, MySQL, and JavaScript, ensuring data integrity across multi-client platforms.
- Optimized complex relational database queries and MySQL schemas, **100K+ records**, improving page load speeds by **30%** and enhancing system performance for large datasets.
- Collaborated with cross-functional teams to translate client functional requirements into production-ready features, integrating responsive frontend views with resilient backend logic.
- Managed full-cycle application deployments on production environments using CyberPanel and cPanel, ensuring 99.9% uptime.
- Enhanced system performance and resolved **40+** critical bugs in existing applications, reducing user-reported errors by **20%**, enhancing platform stability and improving overall user experience.

PROJECTS (COMPANY WORK)

RecipeSys – Restaurant Management System — *Laravel · MySQL · Bootstrap · JavaScript*

- Developed a production-ready restaurant management platform featuring an integrated POS module, inventory tracking, and streamlined kitchen workflows.
- Designed and implemented an Admin & Accounts module using Eloquent ORM to handle secure financial transactions and generate operational business reports.

DFMS – Document & Finance Management System — *Laravel · MySQL · Bootstrap · JavaScript*

Client: AFM Trade International (Clearing & Forwarding organisation)

- Developed a production system for digitizing document and financial workflows for a C&F organization
- Implemented document lifecycle tracking from receipt to archive

- Built financial ledger and payment tracking system with audit-ready records data across **100+** multi-client and multi-shipment relationships
 - Designed a normalised, secure MySQL schema to handle multi-client, multi-shipment relationships
 - Delivered the full system to the client and deployed to a live production environment
-

PERSONAL PROJECT

Career OS – AI-Powered Resume Analysis & ATS Platform

Stack: Laravel 12 · React.js · Zustand · Zod · Tailwind CSS · REST API · OpenAI API

- **Full-Stack Architecture & Validation:** Developed a Career OS platform with a dual-layer validation pipeline using Zod on React frontend for instant field feedback and Laravel Form Requests for backend schema integrity.
- **Queue Architecture & Async AI Processing:** Integrated background queue workers (ProcessResumeJob) with OpenAI (Llama-3.3-70b) in Laravel to asynchronously parse, extract, and match candidate resume data with job descriptions.
- **Centralized State & Auth Pipeline:** Implemented Zustand state management for persistent auth sessions, secure API token storage via Axios interceptors, and real-time client-side polling for background job status updates.
- **OAuth Integration:** Configured multi-provider authentication featuring Google OAuth via Laravel Socialite alongside standard token-based API authentication.

Resdine ERP – Restaurant Management & POS System

Stack: Laravel + Inertia.js + Vue.js + Tailwind.css

- **Full-Stack Architecture:** Engineered a modern Single Page Application (SPA) using a Laravel backend and Vue.js frontend (via Inertia.js) to deliver a seamless, fast-loading user experience.
- **Real-Time Operations:** Implemented live order tracking and stock/inventory management by leveraging WebSockets, reducing synchronization delays across the kitchen and POS terminals.
- **Security & Access Control:** Developed a dynamic menu system featuring drag-and-drop sorting and a strict Role-Based Access Control (RBAC) system to secure sensitive administrative and financial modules.
- **Financial Integrity:** Integrated a secure payment processing gateway alongside an automated HR & Payroll subsystem to manage real-time billing and workforce expenses.

TECHNICAL SKILLS

- **Software Architecture:** System Design, Multi-Tenant Systems, ERP Architecture, REST API Design, Relational Database Design
- **Backend :** PHP, Laravel, Eloquent ORM, Query Optimization, Service Containers, Role-Based Access Control (RBAC), WebSockets
- **Frontend:** React.js, TypeScript (Basic), Inertia.js, Vue.js, Tailwind CSS, Axios, Bootstrap
- **DevOps & Infrastructure:** Docker (Learning), Linux VPS Administration, cPanel, CyberPanel, Production Deployments
- **Database & AI:** MySQL, PostgreSQL, Schema Optimization, OpenAI API Integration
- **Tools:** Git, GitHub, VS Code, Chrome DevTools

EDUCATION:

Bachelor of Science – Computer Science & Engineering

Daffodil International University (DIU), Dhaka | 2020–2024 | CGPA: 3.71/4.00

Higher Secondary Certificate (HSC) – Science

Sirajganj Govt. College, Sirajganj | 2017–2018 | GPA: 4.25/5.00

Secondary School Certificate (SSC) – Science

Power Development Board Secondary School, Sirajganj | 2015–2016 | GPA: 5.00/5.00

LANGUAGE PROFICIENCY:

- Bangla (Native) : Excellent Command in reading, writing and speaking.
- English : Excellent Command in reading, writing and speaking.
- Hindi : Conversational in listening & speaking.
